

ENERGY AND WATER EFFICIENCY POLICY

Our hotel is committed to the efficient, responsible, and sustainable use of energy and water resources throughout all its activities and services. In line with this commitment, we undertake to;

Monitor, measure, and analyze energy and water consumption on a regular basis,

Establish objectives and targets to improve energy and water efficiency and ensure continual improvement of performance,

Provide the necessary resources, information, and support required to achieve our objectives and energy performance targets,

Comply with all applicable legal requirements and other obligations related to energy and water use,

Implement practices aimed at preventing energy and water losses, reducing leakage, and minimizing waste,

Utilize energy-efficient technologies as well as equipment and systems that promote water conservation,

Support and ensure the procurement, design, and maintenance of products, equipment, services, and systems that contribute to improved energy performance,

Raise awareness among employees, guests, and suppliers regarding the efficient and responsible use of energy and water resources,

Encourage the use of renewable energy sources and alternative water management practices, where feasible, to reduce environmental impacts.
